NETWORKABLE COPYWRITER PRO • CD/DVD • BLU-RAY

Any of the network-capable CopyWriter Pro Series tower duplicators are not only the most advanced duplicators on the market, but are extremely simple to use. The ability to connect to any PC within a given network offers convenience and security for office environments of all sizes. The network connectivity feature allows the person setting up duplication jobs to be remotely located from the CopyWriter duplicator. This allows a company to keep any quantity of manual tower duplicators in a safe optimal environment where users can transfer files directly onto the duplicator's internal hard drive. Plus, the network feature allows the storage of the duplicator in a secure environment, where only authorized personnel can access it, preventing general employees from being able to make copies of unauthorized, sensitive, or confidential files.

Burn CD-Rs, DVD-Rs, or Blu-ray Discs one at a time or by the thousands with the Networkable CopyWriter Pro Series. Burn at blazing speeds using virtually any format of recordable media. Connect the CopyWriter Pro to your office network and access the built-in 250GB hard disk drive to store multiple master disc images from anywhere on your network. The intuitive 8-button panel and multi-line display make copying discs easy for the novice user. All the while, the CopyWriter Pro maintains high-end, power-user features demanded by the professionals, like disc verification mode and multi-user account maintenance.

Transfer files from any PC within an internal network directly to the duplicator. Just connect the duplicator to the company's internal network by LAN/Ethernet connection, then transfer the disc image or files that need to be duplicated directly to the duplicator. Users no longer need to burn a master disc to initiate the duplication process.

The Account Management function will authorize only specific user(s) to operate the duplicator with preferred settings. Features the ability to assign numerous passwords for multiple users.
